SUMMARY

Conversational AI Designer with proven expertise in designing intuitive, AI-driven experiences across dialog flows, prompt engineering, usability testing, and prototyping. Delivered measurable business impact by reducing operational costs by **$19K** and achieving a **73% call containment rate** through end-to-end IVR design. Adept at cross-functional collaboration with engineers, product managers, and researchers to create seamless, user-centered AI solutions.

TECHNICAL SKILLS

- **User Experience & Interaction Design:** Wireframing, user flows, prototypes, error handling, intents
- **Tools & Prototyping:** Figma, Visio, Canva, MIX, Copilot, NAS, Voiceflow
- **Research & Data Analysis:** Usability testing, survey design, data analysis (SPSS, R, Excel, SMART PLS)
- **Collaboration & Communication:** Stakeholder engagement, cross-team alignment, user advocacy
- **Agile & Product Development:** Jira, Azure DevOps, cross-team collaboration in iterative environments
- **Languages:** Bilingual (French & English)

EXPERIENCE

HCLTech | Montreal, QC | Remote | 2025–present
Lead Consultant – Conversational AI Designer

- Leading the design and development of enterprise-grade voice applications using **Copilot Studio** for clients across Utilities, Telecommunications, Financial Services, and Insurance sectors.
- Spearheading UX strategy and design decisions, aligning cross-functional stakeholders to deliver scalable conversational AI solutions.

Microsoft | Montreal, QC | Remote | 2023–2025
UX (AI) Designer

- Designed and optimized UX for **AI-driven voice interfaces**, improving user interactions and overall engagement across enterprise platforms.
- Led end-to-end interaction design — from wireframes and user flows to **high-fidelity mockups and prototypes** — delivering scalable UX solutions in collaboration with engineers, PMs, and researchers.
- Led **stakeholder presentations** and facilitated strategic discussions to drive UX decisions and align product direction.

Nuance (a Microsoft company) | Montreal, QC | 2022
UI Design Intern

- Designed and presented UI/UX concepts, improving system usability.
- Created interactive prototypes to enhance user experience across multiple screen sizes and devices.
- Led the migration of IVR systems to new platforms, ensuring a consistent user experience.

Government of Quebec | Montreal, QC | 2023
UX Consultant (Contract)

- Conducted usability testing and accessibility audits, improving digital service design.
- Provided strategic UX recommendations, optimizing engagement and ease of use.

Cook It | Montreal, QC | 2023
UX Consultant (Contract)

- Designed and tested iOS mobile UI, enhancing customer journey and engagement.
- Developed research plans, conducted usability studies, and presented insights to stakeholders.

EDUCATION

- **MSc in User Experience** | HEC Montréal | Thesis: *Human-AI Collaboration in Group Creativity*
- **BA in Honours Psychology (with distinction)** | Concordia University
