Nimmi Luckhee

Conversational AI and UX Designer | nimmiluckhee@gmail.com

Profile

Conversational AI designer specializing in enterprise IVR, dialog flows, prompt engineering, usability testing and prototyping. Delivered measurable business impact through end-to-end voice experience design, including reduced operational costs and improved call containment. Experienced in cross-functional collaboration with engineering, product and research teams.

Core skills

- **Conversational AI:** IVR design, dialog flows, prompts, intents, error handling, keypad and voice experiences
- **Design and prototyping:** Figma, Visio, Canva, Nuance Mix, Voiceflow, Copilot Studio, Google Dialogflow, AWS
- **UX research:** usability testing, interviews, survey design, accessibility reviews and data analysis
- **Delivery:** stakeholder presentations, UX strategy, cross-team alignment, Jira and Azure DevOps
- **Languages:** French and English

Experience

Lead Consultant, Conversational AI Designer | HCLTech

- Lead design and development of enterprise voice applications using Copilot Studio across multiple service industries.
- Define UX strategy, interaction patterns and design decisions while aligning cross-functional stakeholders.
- Create scalable conversational experiences with clear prompts, recovery paths and measurable outcomes.

UX (AI) Designer | Microsoft

- Designed and optimized AI-driven voice interfaces for enterprise platforms.
- Led end-to-end interaction design from user flows and wireframes to prototypes and implementation alignment.
- Presented design rationale to stakeholders and facilitated decisions across product, engineering and research.

UI Design Intern | Nuance, a Microsoft company

- Designed responsive UI concepts and interactive prototypes for conversational products.
- Supported IVR platform migration work and translated complex flows into usable experiences.

UX Consultant | Government of Quebec

- Planned and conducted usability research and accessibility-focused reviews for a bilingual government website.
- Synthesized findings into evidence-based recommendations for navigation and content improvements.

UX Consultant | Cook It

- Evaluated mobile and web journeys through interviews, questionnaires and usability testing.
- Prioritized research findings and recommendations to improve the customer experience.

Selected project experience

- **Telecommunications conversational application:** Designed end-to-end conversation flows, voice persona guidance, error handling and supporting artefacts for a service application.
- **Healthcare IVR:** Led the design team for the complete application experience and presented the design to stakeholders. Tools included Visio and Nuance Mix.
- **Airway voice assistant:** Designed a structured voice experience using conversation design principles and prototyping.

- **Cancer Crush, Microsoft Global Hackathon:** Contributed UI and experience design for a collaborative prototype.

Education

MSc, User Experience | HEC Montréal

BA with distinction, Honours Psychology | Concordia University
